List of Poster Titles and Authors

Poster Session A

1. An efficient tool to analyze fluid flow in nanopores

Samad AHADIAN

Institute for Materials Research, Tohoku University

2. Development of New Ni-based BMGs with High Glass-forming Ability

Yuqiao ZENG

Institute for Materials Research, Tohoku University

3. Possible d⁰ ferromagnetism in MgO doped with nitrogen

Bo GU

Institute for Materials Research, Tohoku University

4. New Ductile Fe-rich Fe-based Bulk Glassy Alloys

Xue LI

Institute for Materials Research, Tohoku University

5. Growth of large-scale single quasicrystal and approximant crystals in the Ag-In-Yb system Can CUI

Institute of Multidisciplinary Research for Advanced Materials, Tohoku University

6. The possibility of spin injection from Co₂MnSi half metal into Si

Md. Ariful Islam NAHID

Department of Applied Physics, Graduate School of Engineering, Tohoku University

7. Dependency of charging effect on metallic coating thickness

KiHyun KIM

Institute of Multidisciplinary Research for Advanced Materials, Tohoku University

8. Hydrogen Storage on Organic Hosts

Natarajan Sathiyamoorthy VENKATARAMANAN

Institute for Materials Research, Tohoku University

9. Interlayer-spacing dependence of T_c in $Li_x M_y$ HfNCl (*M*: molecule) superconductors

Takumi TAKANO

Institute for Materials Research, Tohoku University

10. Stress intensity factors for transverse cracks in multi-layer woven CFRP laminates at cryogenic

temperatures

Shinya WATANABE

Department of Materials Processing, Graduate School of Engineering, Tohoku University

11. Influence of III B group elements (Al, Ga and In) on the optical and electrical properties of ZnO single crystals

Sang-Hwui HONG

Institute of Multidisciplinary Research for Advanced Materials, Tohoku University

12. Microstructure and preferred orientation of high-speed deposited TiN_x films by LCVD Yansheng GONG

Institute for Materials Research, Tohoku University

13. Corrosion Propagation Behavior of Magneisum Alloys under Wet-Dry cyclic condition Shunsuke TAKIGAWA

Department of Materials Science, Graduate School of Engineering, Tohoku University

14. Electrochemical Properties and Contact Resistance of Titanium in PEFC separator environment

Yasutaka SOUMA

Department of Materials Science, Graduate School of Engineering, Tohoku University

15. Mechanical behavior of micro-sized metallic glasses

Yanhui LIU

WPI Advanced Institute for Materials Research, Tohoku University

16. Preparation of high purity La_2O_3 by extraction chromatography

Gwang Seop LEE

Institute of Multidisciplinary Research for Advanced Materials, Tohoku University

17. Raman spectroscopy of carbon onions and carbon nanocapsules under pressure

Junjie GUO

WPI Advanced Institute for Materials Research, Tohoku University

18. Development of New Ubiquitous Type Titanium Alloys for Biomedical Applications

Xiaojie TAO

Institute for Materials Research, Tohoku University

19. Syntheses and Characterizations of B-H and Al-H Based Complex Hydrides

Toyoto SATO

Institute for Materials Research, Tohoku University

20. Grain growth mechanism in friction stir welded 1050 Al alloy during postweld heat

treatment

Kunitaka MASAKI

Department of Materials Processing, Graduate School of Engineering, Tohoku University

21. Synthesis and Characterization of Impregnated Complex Hydrides

Masaharu MENJO

Institute for Materials Research, Tohoku University

22. Influence of cold deformation heat treatment on Young's modulus in Co-Ni-Cr-Mo alloy Takuma OTOMO

Institute for Materials Research, Tohoku University

23. Mechanical properties of Fe-B-Nb-Y Spark Plasma Sintered BMG

Sangmin LEE

Institute for Materials Research, Tohoku University

24. Spin wave tunneling through a semiconductor channel

Lihui BAI

Department of Materials Science, Graduate School of Engineering, Tohoku University

25. Dependence of interlayer exchange coupling on chemical ordering of full-Heusler alloy

Co-Mn-Si based epitaxial trilayers

Subrojati BOSU

Institute for Materials Research, Tohoku University

26. Relationships between double twinning and premature failure in AZ31 Magnesium alloy Daisuke ANDO

Department of Materials Science, Tohoku University

27. Bending properties of implant rods made of Ti-29Nb-13Ta-4.6Zr alloy for spinal fusion Kengo NARITA

Institute for Materials Research, Tohoku University

28. The electrical properties of Cu/MnOx/MnSixOy/SiOx/p-Si/Al metal-oxide semiconductor

devices

VijayKumar DIXIT

Department of Material Science, Tohoku University

29. Synthesis of mono-sized Fe-Co-based metallic glassy particles and their micro-hot-pressing

in the supercooled liquid region

Noriharu YODOSHI

Department of Materials Science, Graduate School of Engineering, Tohoku University

Poster Session B

30. Thermal conductivity of acid treated CNT assisted Cu composites by spark plasma sintering

Seungchan CHO

Department of Materials Processing, Graduate School of Engineering, Tohoku University

31. High minority carrier lifetime in Ga and Ge codoped Czochralski-grown Si crystal Mukannan ARIVANANDHAN

Institute for Materials Research, Tohoku University

32. Preparation of a novel catalyst by hydrogenation of an intermetallic compound AuZr₃ Naruki ENDO

Department of Materials Processing, Graduate School of Engineering, Tohoku University

33. Influence of TiO₂ crystallite size as raw materials on TiO₂ nanotube structure and morphology

Jang-Yul KIM

Institute of Multidisciplinary Research for Advanced Materials, Tohoku University

34. In-situ observation of solid-liquid faceted interface of Si

Masatoshi TOKAIRIN

Institute for Materials Research, Tohoku University

35. CW Terahertz-wave Generation system with Laser diode pumping for applications in high resolution spectroscopy

Srinivasa Rao RAGAM

Department of Materials Science, Graduate School of Engineering, Tohoku University

36. Microstructures of Si multicrystals and their impact on minority carrier diffusion length

Haiying WANG

Institute for Materials Research, Tohoku University

37. Graphene-Based Electronic-Double-Layer Field-Effect-Transistor (EDLT) Devices

Jianting YE

Institute for Materials Research, Tohoku University

38. Crystal Structure and Magnetic Properties of Fe₅₀Co₅₀ Nanoparticles Synthesized by Polyol

Process

Gombai CHON

Institute of Multidisciplinary Research for Advanced Materials, Tohoku University

39. Transparent ferromagnetic semiconductor Ti_{1-x}Co_xO_{2-δ} thin films on glass with sputtering method

Takashi YAMASAKI

Institute for Materials Research, Tohoku University

40. Quantum Monte Carlo study on heme proteins

Jingyu GAN

Institute for Materials Research, Tohoku University

41. Soft Magnetic FeSiBPCu Hetero-amorphous Alloys with High Saturation magnetization He MEN

Institute for Materials Research, Tohoku University

42. The growth behavior of metal-encapsulated silicon nanoclusters and nanotubes

Qi PENG

Institute for Materials Research, Tohoku University

43. Band gap engineering in doped graphene nanoribbons

Narjes GORJIZADEH

Institute for Materials Research, Tohoku University

44. Conducting polymer/polar molecular layer/Nb:TiO2 Schottky junctions toward oxide

electronics

Ryosuke GUNJI

Institute for Materials Research, Tohoku University

45. Effect of shear stress on generation of sub-grain boundary in Si multicrystals for solar cells Isao TAKAHASHI

Institute for Materials Research, Tohoku University

46. Synthesis and electronic properties of CaPdH_{3- δ} with the perovskite-type structure

Shinya AYUKAWA

Department of Applied Physics, Graduate School of Engineering, Tohoku University

47. Search for spin excitation on Bi2201 system by inelastic neutron-scattering experiments

Masanori ENOKI

Department of Physics, Graduate School of Science, Tohoku University

48. Water model experiments for lift migration of small particles in turbulent shear flow

Takuya KATO

Graduate school of Environmental Studies, Tohoku University

49. Elution behavior of boron in coal fly ash into diluted acid

Shunsuke KASHIWAKURA

Graduate School of Environmental Studies, Tohoku University

50. Nanostructure and Magnetic Properties of Nd-Fe-B Thin Films Fabricated by UHV Sputtering

Daisuke OGAWA

Department of Applied Physics, Graduate School of Engineering, Tohoku University

51. Stacking Faults and a Long Period Stacking Phase Dispersed in Grains of

Mg-0.7at%Zn-1.4at%Y AlloyAnnealed at Low Temperature

JongBeom LEE

Institute for Materials Research, Tohoku University

52. Dielectric constant of self-forming barrier layer at Cu-Mn/SiO₂ interface in a MOS capacitor

Seung-Min CHUNG

Department of Materials Science, Tohoku University

53. Creep Parameters of an Mg96Zn2Y2 Thixomolded[®] alloy

Akihiro SHIBATA

Graduate School of Environmental Studies, Tohoku University

54. Magneto-transport and magnetic properties of Co-C granular thin films

Hai WANG

Institute for Materials Research, Tohoku University

55. Terahertz time-domain spectroscopy of clathrate compound Ba₈Ga₁₆Ge₃₀

Tatsuya MORI

Department of Physics, Graduate School of Science, Tohoku University

56. Infrared Spectroscopy of Iodine-Doped DNA

Kei IWAMOTO

Physics Department, Graduate School of Science, Tohoku University

57. Dependence of growth directions on the electrical properties of perovskite oxide

Suvankar CHAKRAVERTY

Institute for Materials Research, Tohoku University

58. Superelasticity and strain-induced magnetization change of ferromagnetic Co-Ni-Al shape

memory alloy

Yuuki TANAKA

Institute for Materials Research, Tohoku University
